

Here are some safety tips to use when crossing a fence. First unload your firearm. Cover the muzzle and put it under the fence away from where you are crossing. Hands free you can cross the fence at a strong point like a post. Pick up your firearm and make sure no obstructions are in the barrel. Now you can load and continue the hunt. If hunting with a friend you can hold the unloaded firearms and after they cross hand the firearms to them and you can cross. Load and hunt. Simple and safe.
