

Deer gun season will soon be here. You need to do several things before season. Check your zero on your gun to make sure it hasn't changed. Sight in your gun with the ammo you will use when you hunt. Using different ammo will make it hit the target in a different spot. Be sure you have enough ammo for the hunt and if you do not buy it now not a day before season as it may not be available. Last of all let someone know where you are hunting and if on private land get written permission well in advance not the day before.
